## SKAGEN /5

# SKA GEN 5

MATCHING SOPHISTICATED DESIGN WITH THE HIGHEST LEVELS OF EFFICIENCY, THE SKAGEN 5 IS PACKED WITH GREAT FEATURES.

As well as having a 5" flue collar, the 4.9kW heat output of the Skagen 5 does not require an air brick. A built-in dynamic control cassette also allows the temperature to be easily maintained.

Combining our Tripleburn® technology and hot air wash system, the Skagen 5 is also DEFRA approved for the Clean Air Act.

10  
YR  
WARRANTY

NORWEGIAN  
/STANDARD

The Norwegian Standard is probably the most stringent emissions standard in the world. The issuing organisation, Standards Norway, works with bodies like ISO to draft new standards that challenge manufacturers to improve quality and safety - and our engineers like a challenge.

As a result, the Løvenholm is one of the few stoves in Britain to pass the test.

DEFRA  
/APPROVED

A number of the stoves in the Cleanburn range are also approved by DEFRA, the Department for the Environment, Food & Rural Affairs. This means that the Løvenholm, Nørreskoven, Skagen, Nordstrand and Strömstad models are permitted for use in Smoke Control areas as levels of particle emission are so low.

NOMINAL  
/OUTPUT

Nominal output is a reasonable heat output that should be achievable without over firing the unit.

Under specific test conditions, the independent test laboratory operate the stove at less than optimum conditions to replicate customer use.

# TRIPLEBURN® /TECHNOLOGY

OUR TRIPLEBURN® TECHNOLOGY INVOLVES THE USE OF THREE STREAMS OF AIR TO MAXIMISE COMBUSTION.

Air is drawn in beneath the fuel, above the fuel (passing in front of the glass door) and behind the fuel. This hot air improves ignition, meaning that the wood or smokeless fuel is burned more efficiently.

This efficiency means you'll get a better performance from less fuel, so you can heat your living space for less than other options might cost. This also translates to a cleaner atmosphere as there is less carbon monoxide and hydrocarbon travelling up the chimney, making Tripleburn® both economical and environmentally friendly.

## DYNAMIC CONTROL

Dynamic Control is an intuitive innovation which gives the user complete control over the temperature output.

This means that unlike other stoves, the output is instantly responsive. The user can alter the simplest of dials and the output changes are instantaneous.

## OPTIMUM SOLID FUEL BURNING CONDITIONS\*

When burning smokeless fuel, the grate is moved to the open position by a single turn of the handle. Air is then directed under the open grate and into the heart of the fire, ensuring a clean, efficient burn.

## INDEPENDENTLY CE TESTED AND APPROVED

All of the stoves in the Cleanburn range meet the stringent CE approval test requirements.

## AIR WASH SYSTEM KEEPS THE GLASS CLEAN

Tripleburn® technology does the work for you. A secondary air wash maintains a stream of air between fuel and door, reducing the build-up of carbon deposits on the glass.

\* Not applicable for the Strömstad or Nordstrand as they have fixed grates.

## OPTIMUM WOODBURNING CONDITIONS\*

The Tripleburn® technology improves the ignition of the fuel with a jet of air directed into the heart of the fire. When the grate is in the closed position creating a flat base, it allows a deep bed of ash to build-up – these are the optimum conditions for burning wood.

## DESIGNED FOR AND TESTED UNDER THE INDEPENDENT TESTING STANDARDS

/ Tripleburn® technology

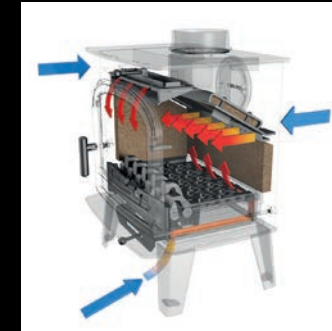

/ Exceptionally hot air wash

/ Dust free, safe and easy riddling\*

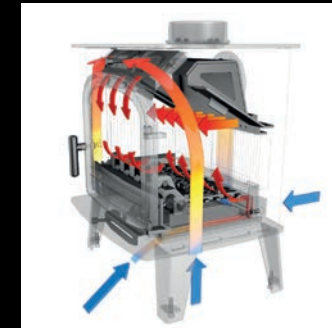

/ Multi-fuel grate system for burning wood or solid fuel\*

## SØNDERSKOVEN / AIR FLOW

## SKAGEN + NORDSTRAND / AIR FLOW

## STRÖMSTAD / AIR FLOW

# OPTIONS

## OPTIONAL / DIRECT AIR

With the direct air kit fitted the stove is able to take air externally instead of internally. This is particularly necessary in airtight buildings.

AVAILABLE ON SKAGEN, NORDSTRAND AND STRÖMSTAD MODELS.

## OPTIONAL / FLUE GATHER BOX

For rear flue installations with limited space.

SUITABLE FOR THE LØVENHOLM AND SØNDERSKOVEN.

## OPTIONAL / FRONT EXTENSION

This front extension enables you to place more fuel into your stove to aid with overnight burning.

AVAILABLE FOR LØVENHOLM, NØRRESKOVEN AND SØNDERSKOVEN STOVES.

## OPTIONAL / FUEL DAMPER

This allows a greater controllability on the flue draw (not always necessary).

AVAILABLE ON ALL MODELS EXCEPT THE STRÖMSTAD AND NORDSTRAND (ONLY THE NORDSTRAND, BLACK, TOP FLUED MODEL ALLOWS A FLUE DAMPER).

## OPTIONAL / FLUE PIPE

We supply various lengths and options of flue pipe.

AVAILABLE WITH THE NORDSTRAND 5 PORCELAIN AND SATIN BLUE.

For further details please download Document J from [www.gov.uk/government/collections/approved-documents](http://www.gov.uk/government/collections/approved-documents)
